Bank of Montreal's Migration Made Easy with Manta

The Bank of Montreal (BMO) had an ambitious cloud migration project. They needed to identify downstream data dependencies, and fast. That's why the 8th largest bank in North America came to Manta.

Challenges Before Manta

No automated way to bulk scan data sources

Struggling to meet data reporting regulatory deadlines

Data funneling upstream posed data quality issues

5 months of manual work needed to identify data dependencies

BMO's Wins with Manta

1,200+
dependencies mapped out

13,000
scanned columns

2,200 hours
↓
7 hours
manual work transformed into a seven-hour process

5 months
↓
1 night
whole team's work done overnight

What's Next for BMO & Manta

Duplicating and implementing Manta across other business areas

Migrating data post-acquisition of a major U.S. bank
