Manta Features and Add-Ons

Discover Deeper Value with Manta

Manta brings intelligence to metadata management by providing an automated solution that helps you drive productivity, gain trust in your data, and accelerate digital transformation. Explore how our features and add-ons provide greater value to your applications.

FEATURES

ADD-ONS

Out-of-the-Box Scanners

Leverage Manta's 50+ supported scanners including all future additions.

Integration with Data Governance Tools and Data Catalogs

Export Manta's lineage to the supported third-party governance solution of your choice (Informatica, Collibra, Alation, IBM, Ataccama, data.world, BigID).

Historical and Indirect Lineage

Compare the state of the environment or dataflows live at any selected point in time. Use indirect lineage to highlight columns that impact data flow but are not part of the data flow.

Unlimited Historical Revisions

Compare the state of the environment or dataflows live at any selected point in time.

Complete Data Journey Including Transformations

Understand exactly how the data flows with attribute-level lineage, as well as how the data transforms along the way and where it ends up.

Unlimited Perspectives

Organize your metadata and lineage into your own folders and hierarchies.

Accurate Impact Analysis

Visualize both direct and indirect data flows as clear as day to perform an accurate impact analysis.

Query API

Run advanced analytics on top of your lineage and automate your impact analysis.

FEATURES

Native User Interface with Advanced Filtering Options

Easily explore, navigate, and tune lineage visualization to your needs.

Single Sign-on with SAML

Simplify and secure the login and authentication process by using a single set of credentials.

Metadata Export from Graphical User Interface (GUI)

Export the metadata and lineage in Manta that is currently being explored.

Keycloak Identity Management

Access a wide range of authentication methods, support for 2FA, token-based authorization for APIs, and a single sign-on experience for all the products on the Manta platform.

5 Manta Instances and Unlimited Users

Deploy up to 5 Manta licensed software products for both production and nonproduction purposes that are accessible to unlimited users.

ADD-ONS

Orchestration API

Support for Manta Admin UI as well as the configuration and management functions for external applications and integrations.

CyberArk Integration

Safely access the necessary passwords directly in CyberArk without having to enter them into Manta.

Open Manta: Exports

Use metadata and lineage data in Manta to augment and optimize your existing processes.

Open Manta: Extensions

Build your own metadata ingestion process for Manta Flow with or without a formal scanner.

Additional Manta Instances

Add extra on-premises installations for all desired business outcomes.

A Team Dedicated to Your Success

Manta's Customer Success Team is here for you at every step. In addition to training and onboarding support, we provide ongoing technical support that addresses your challenges and helps you achieve your goals.
